Arts + Social Impact Explorer Fact Sheet

ARTS + AGING

OVERVIEW

Ten thousand people turn 65 each day, and the fastest-growing age group in the United States is women 85 years of age and older. By 2050, the U.S. population over 65 will more than double, to 86.7 million people, and the global average lifespan is expected to extend by 10 more years. This increase in an aging population will weigh heavily on the already-stressed social services and medical sectors, as well as on the caregivers of these older adults.

Getting older can be both a joy and a challenge. It’s a new time of celebration, freedom (for many) from daily work, the opportunity to learn new skills, explore new places, and enjoy life. It can also be a time of periods of loneliness, declining health, and the grappling with the end of life. The arts are there for all of it.

Arts participation can improve health, decrease depression and loneliness, and increase participation in other kinds of activities. It also has been shown to decrease anxiety, which affects cognitive performance and decision-making, and lower the risk of dementia. Using the arts to engage with aging effectively provides life-long learning, increases social engagement, decreases loneliness and isolation, and improves frail health and memory loss at home or in care facilities.

IMPACT POINTS

$43.3 BILLION IN SAVINGS FROM REDUCED DOCTOR VISITS

After a year of singing in a chorale, older adults visited their doctor an average of 2.5 times less per year. This saves $500 per person, or up to $43.3 billion for the 86.7 million older adults in the United States each year.¹

63% REDUCED RISK OF DEMENTIA

Activities like dancing, playing an instrument, and reading lower the risk of dementia. Older adults who do at least 11 cognitive or physical activities per month are 63 percent less likely to have dementia.²

ARTS MAKE LIFE BETTER

When older adults participate in the arts, they demonstrated statistically significant higher levels of five positive well-being indicators (interest, sustained attention, pleasure, self-esteem, and normalcy).³

10 WEEKS OF ARTS PARTICIPATION TO A STRONGER BRAIN

The arts literally make your brain grow. Participating in the visual arts for as little as 10 weeks has been shown to increase the resiliency and neural connectivity of the brain, making for increased self-awareness and better memory processing.⁴

ARTS PROGRAMS IMPROVE THE HEALTH OF OLDER ADULTS

Professionally conducted participatory arts programs impact older adults by improving health, decreasing depression and loneliness, and increasing participation in other kind of activities.⁵

ARTS KEEP PEOPLE ENGAGED IN LIFE

Research into social dancing shows that such activities lead older dancers to feel more engaged with their life and allows them to connect with pleasant memories while also building new ones in an active, social setting.⁶
**EXAMPLES OF PRACTICE**

**Stagebridge, Oakland, CA**
Stagebridge, the nation’s oldest theater company of older adults, provides professionally taught classes for adults over 50, entertainment and hands-on classes brought to community venues that serve both active and frail elders, and performance-based staff training to healthcare workers and senior services providers.

**MeetMe at MoMA, New York, NY**
MoMA’s MeetMe at MoMA program (2007–2014) provided education programs for people living with Alzheimer’s disease and other forms of dementia and their caregivers. The resources MoMA shares from their experiences are valuable tools to aid others in forming programs for this population, including video from related special initiatives and a series of instructional training videos on how to plan and implement art discussion and art-making programs for this audience.

**Cognitive Dynamics, Tuscaloosa, AL**
Cognitive Dynamics is a program that uses various artforms to work with people with cognitive disorders, such as Alzheimer’s, and their caregivers. The program provides education, research, and supportive, innovative care models that promote human dignity, especially through expressive arts and storytelling.
